Noah,

Thank you for your email. As we've discussed, this is a statutory enforcement action in which the FTC represents the interests of consumers nationwide. We are seeking a final order that would prevent the defendants from engaging in the unlawful conduct alleged in the FTC's complaint, and equitable monetary relief. If we obtain appropriate relief through a settlement, we will file a motion with the court asking it to enter the settlement. Prior to that, settlement information would be non-public, and we would not be able to share it with non-parties. Further, we are not aware of any means through which class counsel could object to a final order in our action.

Teresa Kosmidis
